CAROCON

Carocon Corporation Ranked Fifth in Top 50 Multifamily General Contractors Nationwide

CHARLOTTE, NC (May 8, 2013) –Multifamily Executive (MFE) magazine, a national publication aimed at Developers, Owners and Operators of multifamily properties, has ranked Charlotte-based Carocon Corporation as the fifth Top General Contractor in the US in their [Top 50 Multifamily Third-Party General Contractors of 2013](#) list, recently announced.

MFE reported that many contractors over the last few years have experienced devastating effects from the stunted market. Yet, despite adversity and economic struggle in the industry, Carocon started 2,450 units in 2012, and is now recognized as a leader in the industry for its exemplary business strategy and relationship building. “We are pleased about the continuing trend in multifamily construction, as well as our ability to respond in a timely and cost-effective way,” said Carocon President, Ambrose Dittloff.

Multifamily Executive defines a multifamily unit as five or more units of attached housing. The MFE Top Contractors List considers the number of third-party units under contract by the ranked firm. Specializing in multifamily housing projects and housing developments that are primarily negotiated with private developers, Carocon has successfully completed more than 20,000 residential units while maintaining a pristine reputation with both public and private clients.

The Top 50 General Contractors list is an annual list created by Multifamily Executive magazine, representing industry benchmarks on both national and state levels.
